AROUND THE INDUSTRY

KSB GROUP (FRANKENTHAL, GERMANY) shipped five large submersible borehole pumps for the purpose of dewatering and maintaining the water in New York's Delaware Aqueduct while repairs are done. This task requires the most powerful single-entry submersible borehole pumps KSB has ever produced, with each of the five units featuring a 2,650 hp, 4-pole, 4160 V high-voltage motor. The

One of the "New York pumps" in KSB's Homburg factory shortly before its journey to the USA.
