-Wika Instrument Corp. is offering its WIKA 43X.50 diaphragm pressure gauges for the process industry. Suitable for corrosive environments of gaseous, liquid or highly viscous media, the 433.50 has a glycerin-filled case for applications with high dynamic pressure pulsations or vibration. The 432.50 has a dry case. The stainless steel gauge comes in 4-inch and 6-inch sizes. Wika produces more than 40 million gauges, diaphragm seals, transmitters and thermometers distributed worldwide annually from its facility at Lawrenceville, Ga.
