## Tough Process Gauges

Featured In: Chem. Insider Daily | Instrumentation

Thursday, May 13, 2010

WIKA Instrument Corporation has released the XSEL process gauge series, designed for pressure applications in refining, petrochemical and chemical plants. The XSEL process gauge series features:

- A pressure system that can withstand harsh plant environments.
- Optional stainless steel, Monel and copper alloy.
- Stress reducing Bourdon tube.
- The capability to produce 10 million or more pressure cycles.
- Resistance to vibration and pulsation, which helps to reduce downtime.
