New WIKA XSEL™ Series Process Gauges

May 18, 2010 in [Product Updates](#) | [Tags: buy pressure gauge, pressure gauges for sale, WIKA process gauges](#)

WIKA XSEL™ Series Process Gauges.

WIKA recently introduced the XSEL™ series of pressure gauges, a new line of gauges designed to withstand the heavy stresses of industrial use. The XSEL™ line relies upon a Bourdon tube design to reduce vibration-induced stresses, and offers stainless steel, Monel, and copper alloy models. The XSEL™ line is ideal for high stress processes where you would prefer a dry gauge to a liquid filled.

WIKA specifically designed the XSEL™ gauges for use in high-capacity industrial environments where vibrations take a heavy toll on equipment. The XSEL™ gauges have been proven to last up to five times longer than similar gauges, extending the lifetime of your equipment, and reducing plant down-time. At Dale Foster Sales, we're proud to make these gauges available to our customers, and stand by to answer any questions that you may have about WIKA's latest entry in the market.

If you would like to know more about WIKA's XSEL™ gauges pressure gauges [click here](#), or just want to talk about pressure gauges in general, by all means call me at 800-326-6518.
