

## WIKA Offers Pressure Transmitter

✉ [Send Via E-Mail](#)

LAWRENCEVILLE, GA - May 25, 2010 - WastewaterPR.com - The PSD-30 pressure transmitter features an integral .35" high LED display, single or dual NPN or PNP solid state switches, and user-friendly, intuitive 3-key operation.

PSD-30 pressure transmitter

The PSD-30 pressure transmitter features an integral .35" high LED display, single or dual NPN or PNP solid state switches, and user-friendly, intuitive 3-key operation.

The large, ergonomically arranged programming push buttons provide tactile feedback for immediate confirmation that the touch event was registered by the transmitter.

The transmitter is available with 4-20mA 2-wire or 0-10V 3-wire analog signal outputs. The M12 x 1 electrical connection and display rotate independently to maximize visibility.

The PSD-30 is available in ranges from 15 to 8000 PSI. Compound and absolute ranges are also available.
