## HOT NEW PRODUCTS

### **WIKA PGT23 intelliGAUGE: Hybrid Technology for the Process Industry**

The WIKA PGT23 intelliGAUGE is a problem solver in applications where the pressure is monitored locally with a mechanical pressure gauge and controlled remotely with a 4-20 mA signal. Through the combination of a mechanical pressure gauge and electronic mA or voltage output, the process pressure can be read, even if a power outage occurs. The

PGT23 accomplishes both mechanical and electrical signals in one process location. **WIKA Instrument Corp.** --- [Read More](#)
