Gauges with digital display

DG-10 Digital Display gauge is ideal for applications requiring a local, AA battery-operated measurement and display instrument. They feature a stainless steel housing and are available in two versions: standard (DG-10-S) and enhanced (DG-10-E). Both include a multifunction LCD-display with a bar graph featuring a drag pointer function and a MIN/MAX memory. Both allow the user to easily switch between measurement units including bar, psi and MPa.
