WIKKA Instrument Corporation, The Pressure & Temperature Measurement Instrumentation Leader, Announces Additional Vacuum and Compound Pressure Ranges for the A-10 Pressure Transmitter.

Lawrenceville, GA – The WIKKA A-10 pressure transmitter is now available for applications where vacuum and compound pressures are measured. The A-10 can be used for filter monitoring, pump control, vacuum lift technology and gas analysis where vacuum conditions may occur. It is also now “vacuum proof” and suitable for applications where a vacuum condition may exist on occasion but are not normally monitored as a requirement of the control system or process.

The vacuum and compound ranges are available from 30INHG VAC...0 up to 30INHG VAC ... +300PSI and can be supplied in several common international engineering units including BAR, MPa, kg/cm², and kPa. This availability, along with pending UL, CSA, RoHS and GOST R certifications makes the A-10 suitable for vacuum and pressure measurement applications around the globe.

About WIKKA Instrument Corporation

For over 60 years, WIKKA Instrument Corporation (WIKKA) has continued to globally advance pressure gauge, sensor and temperature instrumentation technology and applications. In the United States, WIKKA's operation utilizes state-of-the-art manufacturing technology and highly automated proprietary production equipment in its nearly quarter-million-square-foot facility in the metro Atlanta suburb of Lawrenceville, Georgia.

As the industry leader in lean manufacturing, WIKKA offers a wide variety of stock and customized instrumentation solutions for critical applications that often are distributed within days. The WIKKA customer service department recently earned the Operational Excellence Award for Leadership from one of North America's leading distributors of industrial maintenance, repair and operation replacement parts. Producing over 40 million gauges, diaphragm seals, transmitters, and thermometers worldwide annually, WIKKA has the most extensive product line in the industry.
