## WIKKA CPG 1000 Data Logging Software

WIKKA Instrument Corporation announces the CPG Log, data logging software for the CPG 1000 digital test gauge. This data logger interacts with all CPG 1000 pressure gauges. It is a cost-effective software piece that meets all your data logging requirements.

### The WIKKA CPG Log allows for a wide array of configuration settings:

- Multiple interval selection options from 1 second to 1 hour
- Data logging runs can be set from a few seconds to several weeks
- Data capture allows for points to be logged continuously, at preset rising values, at preset falling values or it can be set to capture only noise or transients in the pressure signal
- Records up to 9520 data points
- Types of data
  - Interval end
  - Average
  - Minimum
  - Maximum
  - Median
  - Average/Min/Max

### WIKKA's CPG Log software adds to the strong functionality of the CPG 1000 digital test gauge with these standard features:

- Accuracy of 0.05% full scale standard
- Temperature compensated 32° to 122°F
- Pressure ranges from 30" H2O to 10,000 psi
- Displays in 18 standard units with one unit user programmable
- Displays ambient sensor temperature
- Large, back lit 5 1/2" display
- Rugged stainless steel construction NEMA 4X/IP65
- Min/Max
- User configurable sample rate
- CSA intrinsically safe Class 1, Div 2 Groups A,B,C & D
- Supplied with a rubber boot
