Digital indicator with multi-function input
For panel mounting
Model DI32-1

Applications

- Machine building and plant construction
- Machine tools
- Test benches
- General industrial applications

Special features

- Multi-function input for standard signals, resistance thermometers and thermocouples (23 calibrated input configurations)
- Compact design: 1.89\" x 0.94\" x 2.05\" (48 x 24 x 52 mm)
  (67 mm with plug-in terminal)
- 2 transistor switching outputs, output type freely selectable
- MIN/MAX memory and tare function
- Linearisation with up to 5 programmable points possible

Description

Compact dimensions
The model DI32-1 digital indicator is particularly suited for applications with limited mounting space due to its compact dimensions.

For the widest range of input signals
It features a multi-function input with 23 different input configurations. The appropriate input signal can be selected through the terminal assignment by entering the corresponding parameters into the instrument configuration. The instrument can be used for the display of measured values from transmitters with current and voltage signals as well as those from resistance thermometers and thermocouples. It is also possible to use the indicator for the measurement of frequency and rotational speed and as an up or down counter.

Added value through a multitude of functions
The model DI32-1 features two transistor switching outputs. Their switch behaviour, hysteresis and switching delays are parameterisable independently of each other.

The indicator also offers other useful features. These include the ability to query MIN/MAX values through a simple operation of the control keys, a tare function and the possibility to linearize sensor values with up to five programmable points.

All configuration and programming can be carried out through the control keys on the front.
Display

Principle
7-segment LED, red, 4-digit

Character size
0.4" (10 mm)

Indication range
-1999 ... 9999

Input

Number and type
1 multi-function input

Input signals
see table under “Accuracy specifications / Measuring error” (page 3)

Input configuration
Selectable via terminal connections and menu-driven programming

Signal limits for pulse and reset inputs
TTL: Low < 2 V, high > 3 V
NPN: Low < 0.8 V, high via resistor
PNP: Low < 6 V, high > 8 V
NAMUR: Low < 1.5 mA / high > 2.5 mA
Reset: Active < 0.8 V

Case

Material
PC polycarbonate, black, UL94V-0
Sealing: EPDM, 65 Shore, black

Ingress protection (per IEC 60529/EN 60529)
Front: IP 65
Rear: IP 00

Dimensions
W x H x D: 1.89" x 0.94" x 2.05" (48 x 24 x 52 mm)
with plug-in terminal T = 2.64" (67 mm)

Panel cutout
45.0±0.6 x 22.2±0.3 mm

Weight
approx. 0.22 lbs. (100 g)

Mounting
Screw-type mounting brackets for wall thicknesses to 5 mm

Operating conditions

Permissible ambient temperatures
Operation: -4 ... +122 °F (-20 ... +50 °C)
Storage: -22 ... +158 °F (-30 ... +70 °C)

Humidity
0 ... 85 % r.h. annual mean without condensation

Switching output

Number and type
2 semiconductor switching outputs, not galvanically isolated

Switch behaviour
Low side, NPN: max. DC 28 V, 100 mA
High side, PNP: U + - 3 V, 100 mA

Voltage supply

Power supply
DC 9 ... 28 V, not galvanically isolated

Power consumption
≤ 1 W
