Hydraulic hand test pump
Models CPP700-H and CPP1000-H

Applications
- Simple test pressure generation on site, in the laboratory or in the workshop
- For the testing, adjustment and calibration of all types of pressure measuring instruments
- Hydraulic pressure generation up to 700 bar (10,000 psi) or 1,000 bar (14,500 psi)

Special features
- Ergonomic handling
- Precise setting through the fine adjustment valve
- Compact dimensions
- Low weight

Description

Application areas
Test pumps serve as pressure generators for the testing, adjustment and calibration of mechanical and electronic pressure measuring instruments through comparative measurements. These pressure tests can take place in the laboratory or workshop, or on site at the measuring point. The model CPP700-H and CPP1000-H hand test pumps have been specifically developed for test pressure generation on site.

Easy operation
By connecting the test item and a sufficiently accurate reference pressure measuring instrument to the test pump, on actuating the pump, the same pressure will act on both measuring instruments. By comparison of the two measured values at any given pressure value, a check of the accuracy and/or adjustment of the pressure measuring instrument under test can be carried out.

Easy handling
The CPP700-H and CPP1000-H hand test pumps, despite their very compact dimensions, enable simple and accurate pressure generation of up to a max. of 700 bar (10,000 psi) or 1,000 bar (14,500 psi) respectively, with an integrated switching from system pressure to high-pressure generation. For the precise setting for accurate comparative testing, the pump features a fine adjustment valve. As a pressure transmission medium, either hydraulic oil or clean water, free of calcium carbonate, should be used.

The reference instrument is screwed directly to the top of the pump, and the test item is connected using a connecting hose with a G ¼ female thread, included in delivery. The CPP700-H is delivered with a Minimess® 1620 test item hose system as standard.
## Specifications

### Hand test pump

Approvals and certificates, see website
Test item connection hose
CPP700-H: Minimess® system with a G ¼ female pressure gauge connector
CPP1000-H: G ¾ female

Pressure relief valve
Plug screw for fluid reservoir
Fine adjustment valve (volume adjustment)

Pump handles
Toggle control, system and high-pressure generation
Fluid reservoir
Connection G ½ female, freely rotating for reference instruments
Blind plug, do not open!

Recommended reference pressure measuring instruments

- Precision digital pressure gauge model CPG1500
  Measuring ranges  up to 1,000 bar (15,000 psi)
  Accuracy  0.05 % of span
  For further specifications see data sheet CT 10.51

- Hand-held pressure indicator model CPH6200
  Measuring ranges  up to 1,000 bar (14,500 psi)
  Accuracy  0.2 % of span
  For further specifications see data sheet CT 11.01
Hand-held pressure indicator model CPH6300

Measuring ranges up to 1,000 bar (14,500 psi)
Accuracy 0.2 % of span

For further specifications see data sheet CT 12.01

Precision hand-held pressure indicator model CPH6400

Measuring ranges up to 6,000 bar (85,000 psi)
Accuracy up to 0.025 % of span

For further specifications see data sheet CT 14.01

ProcessCalibrator model CPH6000

Measuring ranges up to 8,000 bar (115,000 psi)
Accuracy up to 0.025 % of span

For further specifications see data sheet CT 15.01

Calibration software

WIKA-CAL calibration software for creating calibration certificates or logger protocols

For specifications see data sheet CT 95.10

Calibration case

Consisting of:
- Plastic service case with foam insert
- Precision digital pressure gauge model CPG1500
- Hydraulic hand test pump model CPP700-H
Scope of delivery

CPP700-H
- Hand test pump, model CPP700-H, oil/water
- Minimess® test item hose, length 1 m (3.28 ft)
- Bulkhead connector, G ¼ female
- Operating instructions

CPP1000-H
- Hand test pump, model CPP1000-H, oil/water
- High-pressure test item hose, length 1 m (3.28 ft)
- Connection, G ¼ female
- Operating instructions

Accessories

Adapter set
- Adapter and sealing set, “BSP” for test item hose, G ¼ male to G ⅛, G ⅜ and G ½ female
- Adapter and sealing set, “metric” for test item hose, G ¼ male to M 12 x 1.5, M 20 x 1.5 and Minimess®
- Adapter and sealing set, “NPT” for test item hose, G ¼ male to ⅛ NPT, ¼ NPT, ⅜ NPT and ½ NPT female

Case
- Plastic case, incl. foam insert with free spaces for model CPP700-H or CPP1000-H;
  dimensions (W x H x D): 440 x 370 x 140 mm
  (17.3 x 14.6 x 5.5 in)

Pressure transmission medium
- Special oil for CPP1000 and CPP1600 test pump series in plastic case, contents 1 litre
- Hydraulic fluid based on VG22 mineral oil in plastic bottle, content 1 litre

Other
- Connection adapter, G ¼ male to G ½ female, material: stainless steel
- Sealing and maintenance set for model CPP700-H or CPP1000-H
- Spare hose for model CPP700-H or CPP1000-H, length 1 m (3.28 ft)
