Hazardous Area Non-incendive Transmitters
Model N-10, N-11

Applications
- Natural gas compressors
- Wellhead monitoring
- Pipeline pressure
- General industrial applications

Special Features
- FM / CSA approved Non-incendive for Class I Division 2, Dust-ignitionproof for Class II, Division 1
- Engineered to meet the harsh demands of gas compressor applications
- Does not require the use of intrinsically safe barriers
- NACE MR-01-75 compliant wetted parts
- 4-20 mA or low power 1-5 volt output signals available

Description
Type N-10 pressure transmitters are specifically designed to meet the durability and performance requirements of gas compressor systems. These pressure transmitters feature an industry standard 4-20 mA 2 wire signal output, NEMA 4X (IP 67) weather protection and are extremely resistant to pressure spikes, vibration and moisture intrusion. NACE MR-01-75 compliance provides extra resistance against sulfide stress cracking when exposed to gases containing sulphur.

Type N-11 pressure transmitters feature a flat, non-clogging diaphragm. This is designed for use with viscous fluids or media containing particulates that could clog the pressure port of the standard NPT version.

The transmitters are engineered to meet Class I Division 2 non-incendive protection requirements, as well as Class II Division 1 dust-ignition protection requirements in hazardous environments. Each undergoes extensive quality control testing and calibration to achieve a linearity of ≤ 0.25% full scale. In addition, each pressure transmitter is temperature compensated to assure accuracy and long term stability when exposed to severe ambient temperature variations.

(vacuum, gauge pressure, compound ranges, and absolute pressure references are available)

Materials

- **Wetted parts**: Nace compliant
  - N-10: Stainless steel (> 1,000 psi stainless steel and Elgiloy)
  - N-11: Stainless steel; O-ring: NBR (Viton or EPDM)
- **Case**: Stainless steel
- **Internal transmission fluid**: Synthetic oil (only for pressure ranges up to 300 psi or flush diaphragm units)

**Power supply** $U_a$
- DC V
  - $10 < U_a < 30$ for 4...20 mA, 2-wire
  - $6 < U_a < 30$ for 1...5 V, 3-wire low power version

**Signal output and maximum load** $R_x$
- $4...20$ mA: $R_x = (U_a - 10$ V$) / 0.02$ A with $R_x$ in Ohm and $U_a$ in Volt
- $1...5$ V, 3-wire: $R_x > 10$ kOhm

**Response time** (10...90 %) ms
- $\leq 1$ (10 ms when media temperatures are below -22 °F (-30 °C) for pressure ranges up to 300 psi or with flush diaphragm)

**Isolation voltage** $V$
- 500

**Accuracy**
- % of span
  - $\leq 0.25$ (BFSL)
  - $\leq 0.5$ (limit point calibration)

**Non-repeatability** % of span
- $\leq 0.05$

**Hysteresis** % of span
- $\leq 0.1$

**1-year stability** % of span
- $\leq 0.2$ (at reference conditions)

**Permissible temperature of**
- Medium
  - -22...+176 °F
  - -30...+80 °C (-40 °C only with NPT threads)
- Ambient
  - -22...+176 °F
  - -30...+80 °C
- Storage
  - -22...+221 °F
  - -30...+105 °C

**Compensated temp. range**
- 32...+176 °F
- 0...+80 °C

**Temperature coefficients in compensated temp range**
- Mean TC of zero % of span
  - $\leq 0.2 / 10$ K ($< 0.4$ for pressure range $< 100$ InWC)
- Mean TC of range % of span
  - $\leq 0.2 / 10$ K

**Approval authority**
- Factory Mutual (FM) non-incendive with entity approval for:
  - Class 1, Division 2, Groups A, B, C, D
  - Dust ignition-proof for Class II, Division 1, Groups E,F and G

**Maximum electrical ratings**
- $V_{max}=30$V, $I_{max}=30$mA, $P_{max}=1$W
- For 2wire system: $C_{i}=22nF$ (flying leads: $+0.2$ nF/m), $L_{i}=0mH$ (flying leads: $+2µH/m$)
- For 3wire systems: $C_{i}=140nF$ (flying leads: $+0.2$ nF/m), $L_{i}=0mH$ (flying leads: $+2µH/m$)
- FM Standards according to FMRC 3600, 3611, 3810

**Ingress protection**
- NEMA 4X (IP 67)

**Shock resistance** g
- 1,000 according to IEC 60068-2-27 (mechanical shock)

**Vibration resistance** g
- 20 according to IEC 60068-2-27 (vibration under resonant conditions)

**Wiring protection**
- Protected against reverse polarity, overvoltage, and short circuiting

**Weight** lb
- 0.4

---

* Pressure applied up to the maximum rating will cause no permanent change in specifications but may lead to zero and span shifts
* Exceeding the burst pressure may result in destruction of the transmitter
1) Only Type N-10.
2) For Type N-11: the burst pressure is limited to 21,000 psi unless the pressure seal is accomplished by using the sealing ring underneath the hex.
3) Includes non-linearity, hysteresis and repeatability. Limit point calibration performed in vertical mounting position with pressure connection facing down.
4) Transmitters will function when exposed to these extended temperature ranges. The media, when exposed to temperature extremes, may change characteristics that effect transmitter performance.

* Items in curved brackets are options available at additional cost.
