

# Diaphragm pressure gauge with electrical output signal

## For the process industry, high overload safety to 40, 100 or 400 bar

### Models PGT43HP.100 and PGT43HP.160

WIKA data sheet PV 14.07

for further approvals see  
page 5

**intelliGAUGE®**

### Applications

- Acquisition and display of processes
- Output signals 4 ... 20 mA, 0 ... 20 mA, 0 ... 10 V for the transmission of process values to the control room
- For measuring points with increased overload of 40, 100 or 400 bar
- Easy-to-read, analogue on-site display needing no external power
- Safety-related applications

### Special features

- No configuration necessary due to “plug-and-play”
- Scale ranges from 0 ... 16 mbar
- Wide choice of special materials
- For gaseous, liquid and aggressive media, also in aggressive environments, due to all stainless steel construction
- Safety version S3 per EN 837

### Description

Wherever the process pressure has to be indicated locally and, at the same time, a signal transmission to the central control or remote centre is desired, the model PGT43HP intelliGAUGE® (patent, property right: e.g. DE 202007019025) can be used. Due to the metallic pressure element limit stop, these instruments have a high overload safety in the ranges of 40, 100 and 400 bar.

The intelliGAUGE® model PGT43HP fulfils all safety-related requirements of the relevant standards and regulations for the on-site display of the working pressure of pressure vessels. An additional measuring point for mechanical pressure display can thus be saved.

The model PGT43HP is based upon a model 432.36 high-quality, stainless steel safety pressure gauge with a nominal size of 100 or 160. The pressure measuring instrument is manufactured in accordance with EN 837-3.

**intelliGAUGE® model PGT43HP**

The robust diaphragm measuring system produces a pointer rotation proportional to the pressure. An electronic angle encoder, proven in safety-critical automotive applications, determines the position of the pointer shaft – it is a non-contact sensor and therefore completely free from wear and friction. From this, the electrical output signal proportional to the pressure, e.g. 4 ... 20 mA, is produced. The measuring span (electrical output signal) is adjusted automatically along with the mechanical display, i.e. the scale over the full display range corresponds to 4 ... 20 mA. The electrical zero point can also be set manually.

The electronic WIKA sensor, integrated into the high-quality pressure gauge, combines the advantages of electrical signal transmission with a local mechanical display that remains readable during a power failure.

An additional measuring point for mechanical pressure display can thus be saved.

Permissible temperature <sup>4)</sup>	
Medium	+100 °C [+212 °F] maximum Option: +200 °C [+392 °F] maximum
Ambient	-20 ... +60 °C [-4 ... +140 °F]
Temperature effect	When the temperature of the measuring system deviates from the reference temperature (+20 °C): max. $\pm 0.8$ %/10 K of full scale value
Case	Safety version S3 per EN 837: With solid baffle wall (Solidfront) and blow-out back Instruments with liquid filling with compensating valve to vent case
Case filling	Without Option: With silicone oil M50 case filling, ingress protection IP65

1) Application test required

2) Depending on scale range and overload safety, different flange Ø apply. See dimensions from page 6.

3) 400 bar overload safety for scale ranges < 400 mbar on request

4) For hazardous areas, the permissible temperatures of the output signal variant 2 will apply exclusively (see page 4). These must not be exceeded at the instrument either (for details see operating instructions). If necessary, measures for cooling (e.g. syphon, instrumentation valve, etc.) have to be taken.

## Model PGT43HP.100 and PGT43HP.160

<b>Wetted materials</b>	
Diaphragm element (pressure element)	≤ 0.25 bar: Stainless steel 316L > 0.25 bar: NiCr alloy (Inconel) Option: Coated with special materials such as PTFE, Hastelloy, Monel, nickel, tantalum, titanium, silver (instruments with accuracy class 2.5)
Process connection with lower measuring flange	Stainless steel 316L Option: Lined/coated with special materials such as PTFE, Hastelloy, Monel, nickel, tantalum, titanium, silver
Pressure chamber sealing	FPM/FKM
<b>Non-wetted materials</b>	
Case with upper measuring flange and flange connecting screws, movement, bayonet ring	Stainless steel
Dial	Aluminium, white, black lettering
Instrument pointer	Aluminium, black
Set pointer	Aluminium, red
Window	Laminated safety glass
<b>Ingress protection per IEC/EN 60529</b>	IP54 Option: IP65

## Accessories

- Sealings (model 910.17, see data sheet AC 09.08)
- Valves (models IV20/IV21, see data sheet AC 09.19, and models IV10/IV11, see data sheet AC 09.22)
- Syphons (model 910.15, see data sheet AC 09.06)
- Cooling element (model 910.32, see data sheet AC 09.21)
- Switch contacts (see data sheet AC 08.01)
